## MSC FANTASIA

### Welcome to Palermo!

Palermo is the capital city of Sicily; it is situated 14kms south of the Gulf of Palermo and faces the North West Coast of the Island. It has a fertile agricultural landscape known as the "la Conca d'Oro" (Golden Shell) which is famous for its production of citrus fruits. This developed area, which was encircled by a boundary wall, expanded during the Arabian and Norman times, with a cluster of irregular narrow streets. This confusing maze of streets was dismantled by the "Aragonese" people and 2 roads were formed as an arterial route by demolishing some of the buildings in the area. The first road is perpendicular to the coast and was known as Marmorea, Vial Toledo today is known as Corso Vittorio Emanuele, while the second one is known as via Maqueda. After the inclusion of the island to Italy, the developed area was substantially expanded, according to strict regulations taking into consideration the plans for future grid road development.
